# Source Water Protection Workshops

## March-April 2009 • Arizona

Arizona has identified the most prevalent and threatening contaminant risks to Public Water Systems as underground storage tanks/leaking underground storage tanks; Superfund sites; agriculture; on-site wastewater treatment/septic systems; marinas & golf courses. These Source Water Protection (SWP) workshops are designed to bring together representatives from a diverse array of organizations involved in managing and protecting local water sources. A special focus will be the threats to drinking water sources. Resources will be provided on SWP, including policy background, lessons learned, tools, and discussion on implementing SWP plans in Arizona. The intent is to strengthen and develop a participative learning environment that fosters collaborative next steps towards solutions to best support sustainability of future water quantity and quality in Arizona communities.

### Expected Outcomes:

- To learn about the Source Water Protection SMART Program: Strategic Management & Available Resources & Technologies
- To raise participants awareness level of the already existing resources for ensuring source water protection
- To educate on Arizona's Source Water Assessment and Protection (SWAP) Program issues
- Participants will be able to return to their organization and advocate for long range thinking in the protection of drinking water sources

### Tentative Agenda:

- Registration, Networking
- Welcome and Introductions
- Source Water Threats
- Readiness to proceed/ADEQ SWAP
- Lunch (on your own)
- SMART: Social Marketing
- Source Water Protection Success Stories
- Steps You Can Take
- Adjourn

### Fee:

There is **no charge** to attend these workshops, but please register in advance, as space is limited.
